

**Kinderhilfswerk Eine Welt (KHW) has been supporting children and young people in Africa, Asia, South America and Europe with a focus on education, health and care since 1975. We are currently focusing on projects in Nepal and Mali.**

The aim of our projects is to support people in a sustainable and future-orientated way and, through self-efficacy experiences and autonomous acting in the projects to avoid long-term dependencies. The main focus lies on capacity building in the local population through direct cooperation with local people and our local project partners. The population in the project regions is involved in our projects from the start.

We build schools and health centres in remote regions where there would otherwise be no access to education and health facilities and pay attention to the local value chain in order to strengthen the local economy. For example, school desks are built by local companies and school books are procured in the project country. In addition to the infrastructure part, our projects always include a capacity-building part in the form of workshops to ensure the participation of the local population. In this way, we can address highly relevant and sensitive socio-political issues such as the unequal treatment of girls or genital mutilation treatment.

**The projects are implemented by our local partners. These are exclusively local non-profit organisations with whom we have been working in a trusting partnership for many years. They know the needs of the local people as well as the cultural conditions and ensure that donations are used responsibly and transparently.**

The Kinderhilfswerk Eine Welt team is characterised by a credible and transparent way of working. We value dialogue with our supporters and are always available to answer questions about our work, feedback and new ideas. We want to do what is humanly possible within our framework and focus on partnerships for development cooperation without detours.

In summary, the **Kinderhilfswerk Eine Welt** stands for:

- Partnerships for development cooperation
- Sustainable health and education work in Africa, Asia, South America and Europe
- Empowerment and capacity development
- Promoting the local economy in the project countries
- Transparency and efficiency
- Cultural sensitivity
- Climate protection and environmental education
- Women's and children's rights

As a sign of the responsible handling of the funds entrusted to us, the children's aid organisation Kinderhilfswerk Eine Welt e.V. has borne the following symbol since 1992 – with uninterrupted annual renewals.

The current premises in Bolokoro are in great need of renovation.

Workshop on the topic of teamwork.

The joy of working together in the chemistry project.

## MALI

The consequences of the political and economic crisis in Mali are still visible. Therefore, it is important for us to strengthen civil society and access to medical care.

**A maternity ward in Bolokoro:** Together with Getzner Textil AG a new maternity ward with solar panels is to be built for the Malian village. Due to a lack of capacity, the necessary examinations and treatment for pregnant patients can currently only be offered to a limited extent. The project will not only give people in Bolokoro and the surrounding areas access to gynaecological and general medical care in the long term.

- ▶ **The maternity ward provides medical care for more than 2,800 villagers – including 1,053 women – a medical care facility.**

## NEPAL

We have been active in Nepal since 2004 and, together with our partner organisation Shanti Griha Nepal has successfully implemented 16 school projects. In the project locations, which are often only accessible on foot, the children do not have the same opportunities as children who live in the city.

**A new school for the village of Kolar:** There is a small, dilapidated school in Kolar. Children from kindergarten age to fifth grade are taught there. However, age-appropriate lessons cannot take place due to the poor condition of the school. There is also a lack of learning and teaching materials. The construction of three new classrooms will create more school places. The new classrooms will be equipped with learning and teaching materials. In addition, the hygiene situation will be improved by building two toilets and the establishment of a water supply. In addition, workshops are organised by our project partner Shanti Griha.

- ▶ **A total of 114 children receive a reliable school place and over 700 people benefit from the training programmes.**

## ECUADOR

Since 2022, KHW supports children and young people of the South American Andean republic. The focus of the project is on supporting children and young people from socially disadvantaged families and preventing violence.

**Neighbourhood centre PADE in the capital Quito:** PADE („Para dar Esperanza“, loosely translated as „giving hope“) offers space on two floors for around 100 children and young people to play, learn and do handicrafts. As an important contact point, the centre provides a safe environment that contains child-orientated care as well as medical and psychosocial counselling services.

- ▶ **The project creates safe spaces for children and young people and offers them educational and medical support.**

- ▶ **We also support schools, health facilities and social projects in Rwanda, South Africa, Argentina and Ecuador: [khw-eine-welt.de/projekte/](https://khw-eine-welt.de/projekte/)**
